Section B**Part I**

Read the passage below and answer ALL the questions that follow.

THE HYBRID CAR – CAR OF THE ERA

- i Choosing a new car is always about weighing your options. You have to consider your budget, the purpose of buying one, the type and the features. There are many different types of cars available and this may confuse you as to which to buy. One of the latest types of car is the hybrid car which is referred to as the "car of the era". There are many unique features that make the hybrid car different from the **conventional** cars. Because of **its** uniqueness, the hybrid car is now growing in popularity. Many people are considering getting rid of their conventional car in favour of a hybrid car due to its several advantages. 5
- ii The main advantage is fuel **consumption**. Hybrid cars consume fuel efficiently because it has two engines. It has a traditional petrol engine and electric motor and batteries. **They** work together to cut down on fuel consumption. The combination of these two engines allows a hybrid car to save about 30 miles a gallon. It saves fuel because the petrol engine will automatically shut off when the car stops and it will only turn on when you step on the accelerator pedal. So the rising price of fuel will not affect you much if you are driving a hybrid car. 10 15
- iii Since the hybrid car uses petrol and batteries as **its** sources of power, it uses less petrol than the conventional car. Therefore hybrid cars **emit** lower toxic emissions as compared to conventional petrol-powered cars since less gasoline is being burned. So, it causes less pollution and as less carbon dioxide is released into the atmosphere. It is very important for you to know that for every kilometre you drive a conventional car, carbon dioxide is released into the air building up greenhouse gases which contribute to air pollution. So by driving a hybrid vehicle, you will reduce the emission of carbon dioxide into the atmosphere. 20 25
- iv However, side by side with the advantages are **drawbacks**. One is **its** price. Hybrid cars are more expensive than conventional cars

because of the price of the battery installed in the car. The battery may last for several years but to replace **it** will cost you several thousand ringgit 30
v which is equivalent to buying a used car. Thus hybrid cars are only for those who can afford them.

In short, the benefits of the hybrid cars are that it **consumes** less petrol and protects the environment. However, **it** is more expensive than the conventional car. Thus hybrid car producers should now work to reduce the cost of the production to make it affordable to everyone. *If everybody drive a hybrid car, we will have a greener earth.*

Circle the correct referents answer to the questions below.

1. conventional (paragraph i, line 6)

- A. latest
- B. modern
- C. new
- D. traditional

(1 mark)

2. consumption (paragraph ii, line 9)

- A. Operation

PART 2

Information Transfer

This part consists of **TWO (2)** questions.

QUESTION 1

1 Read the following text. Then, answer questions 1 - 10

BENEFITS OF EATING SEA URCHIN

Sea urchin is delicious and actually provide beneficial nutrient. One of the benefits of eating sea urchins is that it is rich in protein. It is an good substitute for protein – rich foods such as meat, fish, beans and legumes. Your body needs protein to build and repairs bones, muscles, cartilage skin and blood.

Next, sea urchins are a good source of fibre. This will be helpful in ensuring that you do not suffer from constipation or haemorrhoids. Usually, foods such as hot meal, bran and other wholegrain wheat products like brown porridge and bread provide such nutrition.

Sea urchins also provide sufficient amount of vitamin C. Vitamin C is essential for combating deficiencies, such as scurvy. This vitamin can also be obtained by consuming mangos, oranges, green leafy vegetables and health supplements.

Besides Vitamin C, sea urchins also offer Vitamin A, mainly found in carrots, kale, spinach, winter squash, collard greens and turnip green. These vitamins are vital in improving your immunes system.
